

FACTORY ACCEPTANCE TEST (FAT) CENTRE

TEST, TRAIN, IMPLEMENT.

SAVE TIME AND MONEY WITH THE FAT CENTRE

TEST, TRAIN, IMPLEMENT

The Dallmeier Factory Acceptance Test (FAT) Centre simulates a customer's entire real-world solution, ensuring smooth implementation and operation of the system. In addition, personnel can be thoroughly trained within the Dallmeier FAT facilities in Regensburg, Germany.

The FAT process includes camera-, recording-, software- and network-components according to customer requirements as well as a detailed documentation of the complete solution.

TRUE PLUG & PLAY

The Dallmeier FAT Centre thus guarantees error-free operation as well as the fast and smooth implementation of even the largest enterprise solutions. This „plug and play“ approach saves time and money for all stakeholders.

BUDGET & PROJECT MANAGERS

benefit from maximum economic efficiency thanks to high investment and planning security.

INSTALLERS & INTEGRATORS

have less effort thanks to the tested implementation and deployment of all components.

SECURITY OFFICERS & OPERATORS

can work efficiently with the systems from day one thanks to the optional workshops in the Dallmeier SIT®-Point.

PROVEN PROCESSES FOR MAXIMUM EFFICIENCY

ALL DETAILS CONSIDERED

The Dallmeier FAT Centre not only configures IP addresses, hosts, time zones of the systems but also takes care of the installation of the ordered software - including the set-up of user groups and user-password combinations.

DOCUMENTATION AND CONTROL

Extensive requirement specifications guarantee a smooth implementation of the solution. In addition, individual test procedures ensure the compatibility of third-party systems as well as customised programming.

4 STEPS TO SUCCESS

The FAT services can be individually adapted - from pure testing of the installation, on-site installation and training to complete documentation.

INTERNAL FAT

The infrastructure of the customer's environment (cameras, recording, software, network) is configured and real-world operation is simulated and tested.

EXTERNAL FAT WITH CUSTOMER

The customer's security officers and/or technicians can optionally be part of and supervise test procedures at Dallmeier.

WORKSHOPS

In interactive workshops users have the opportunity to familiarise themselves with the systems, practice real-world operation procedures and have all open questions answered by the Dallmeier experts.

SITE ACCEPTANCE TEST (SAT)

The optional on-site acceptance test (SAT) in the final customer's environment helps identify any final challenges and ensures that the solution runs as smoothly as tested before.
